### **NEWSLETTER | JANUARY 2022**

# MARKET R3VIEW Q4 2021

#### A return to office life

#### **COVID** news

The government introduced its Plan B restrictions in December 2021 to battle the Omicron variant, but last week eased them against lowering levels of infections nationally.

Along with the end of working-from home guidance, requirements in England for face masks and Covid

passports have both been dropped this week.

#### **Demand surges upwards**

Demand for rental properties has **Pressure on rents** increased significantly with the reopening of the economy.

reduces, and people start returning to the office, tenant demand will continue to push upwards over the coming months. We have already observed demand in the last quarter matching pre-Covid levels and prospective tenants (both private and driven by corporate relocations), at a level much higher than at the same time in 2020; with some early indications that tenants are also returning to London after many left durina previous lockdowns.

### Supply continues to fall

increased levels of demand. New instructions are flat and the

expectation is that the low stock experienced in previous months will carry through into Q1 & Q2 2022.

Falling stock levels against surges in demand continue to maintain a strong upward pressure on rents. As the Omicron variant threat **FIGURE 5 – a spot light on...** provides an overview of what "supply" looks like in the capital.

#### A look ahead

The Omicron variant ended up being far less of a threat than initially feared, and the expectation is that demand will therefore remain strong, if not much greater in 2022 than it was in 2021.

It is important to keep optimism in check, as the COVID pandemic seems to be entering its endgame. If we have learned anything over the last two years, it's to expect the Supply is not catching up with unexpected as far as this virus is concerned. But the signs are certainly positive.

# For the Quarter

101.4

#### **OECD UK Business Confidence Monitor**

Business confidence is now flattening and despite a slight nudge upwards in Q4 2021, it is trending downwards on a month by month basis and in the opposite direction to OECD consolidated index - a reflection of political and Brexit uncertainties still prevalent in the UK.

RPI

6.0% Nov 7.1% Dec 7.5%

#### RPI All Items: % change over 12 months

RPI is a measure of inflation - recent inflationary pressures have pushed RPI upwards. As at the end of December, it stands at 7.5% and this may bring some pressure on rent increases on renewals despite contractual caps often in place on inception.

RICS Lettings Survey

#### 3 mths % change responses (down/up/same)

Three-months tenant demand has levelled off after a surge last quarter, but supply is not catching up with low levels of new landlords' instructions. This will be pushing rents further up over the coming quarter, in line with Agents' expectations on this.

Source: RICS Monthly Market Surveys

FIGURE 3 Frustrated with the lack of open and reliable consolidated rental data in London, R3 started its own two rental tracking indices in Q1 2019.

The mismatch between rising demand and dwindling supply identified last quarter has continued. This has driven rents back to pre-pandemic levels with R3-SP Index at 149.1 (against 139.8 prepandemic) and R3-P Index at 101.1 (against 91.4 pre-pandemic). It seems, for the rental market at least, that we are out of the proverbial woods.

#### Marco Previero

Director and Research Lead at R3

"Despite the latest Omicron variant surge, the rental market in London remains strong. This latest COVID wave wasn't even a minor set back. Most agree that rent levels are set to stabilise and grow over the coming months, as restrictions begin to lift again – as recent government announcements have confirmed."

AR3A INSIGHTS Every auarter, R3Location produces its own research which it publishes on its website and is available to all. The most recent one is now available.

R3 has **published** its latest AR3A Insights research to include London, the lower Thames Valley region, and Birmingham and its commuter belts.

You can access these and other valuable (free) research on our website.

## AR3A INSIGHTS

#### Anna Barker Director and Operations Lead

"Our research efforts are in direct response to clients' needs. They value data that's helpful to their relocating employees. R3 is the only DSP engaging in this activity."

#### FIGURE 5 – Spotlight on... London Rental Market

Every quarter R3 includes a Spotlight On section. This month, the focus is on a high level view of the rental market in London.

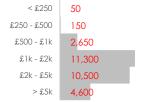

The London rental market is a complex market often best understood at the level of the postcode. There is some data which can be useful to understand some of the challenges inherent within

Figure 5 gives a high level perspective of some macro-indicators about the London rental market overall in terms of total available stock, its distribution against "per calendar month" (pcm) rent, availability per property size, and its make-up in terms of flats, houses and rooms.
