

R3DUCING CARBON EMISSION

R3 is carbon neutral

For the 3rd year running!

For the third year in a row, we have fulfilled our ambition to become the UK's leading voluntary carbon **neutral** Destination Services Provider.

How do we do it?

STEP 1 CALCULATE

We partner with an experienced and qualified organisation to calculate R3's direct and indirect emission footprint according to international recognised standards.

STEP 2 OFFSET

R3 is actively supporting certified carbon-offsetting projects around the world to reverse our total carbon emissions when delivering destination services.

STEP 3 CERTIFY

R3 has now received its carbon neutral certification for the third year in a row, reaffirming its commitment to contribute to projects that provide lasting social and economic benefits.

FULLY CERTIFIED CARBON NEUTRAL

R3Location Limited has met all certification standards in measuring, calculating and carbon offsetting all organisational carbon emissions within the Scope 1, 2 and 3 GHG emissions boundary.

“ Sustainability for R3 is much more than being carbon neutral. Look out for future newsletters to read about our broader ESG agenda.

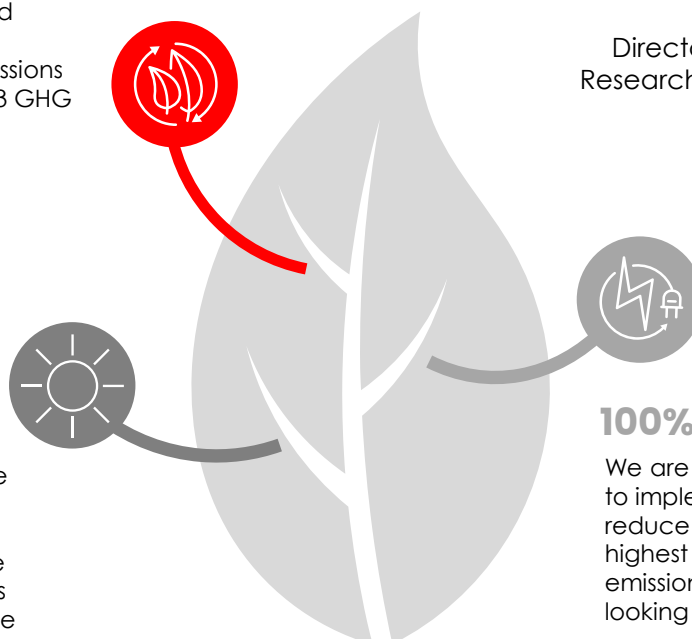

Marco Previero

Director and

at R3

SUPPORTING THE CLIMATE

Climate change is one of the biggest challenges we face as a society. R3 supports companies around the globe that are driving innovation towards finding solutions to help the environment.

100% COMMITTED

We are committed to continue to implement changes to reduce emissions linked to our highest proportion of total emissions: days on the road looking at properties.
